

Harvard Model Congress Boston 2024

Dear Delegates,

Welcome to Harvard Model Congress Boston 2024 and welcome to the National Economic Council! The National Economic Council (NEC), established in 1993, serves as an advisory board to the President of the United States on economic policy both within the U.S. and internationally. The NEC not only recommends policy to the President but also monitors the implementation of previously passed economic policy items.

In our time together, we will be discussing economic drivers of and solutions for homelessness in the United States, a crisis that affects 500,000 Americans on any given night, and immigration policy, a rapidly changing landscape of immense importance. Addressing these problems will require focusing on policy issues that impact millions of Americans from the perspective of a taxpayer, politician, economist, and citizen. As the NEC, it is your job to propose economic policy to ameliorate these issues.

To fill you in on a little bit about your chairs:
